

Fund Manager Commentary

A pivotal question for markets revolves around economic and earnings growth. We expect most central banks to initiate cuts in 2H2024 given more economic weakness. The period ahead is poised to be marked by heightened volatility and pronounced disparities across sectors and individual stocks. While market returns remain robust amid a resilient economy, the evolving investment landscape places greater emphasis on alpha generation.

Optimism pervades MENA region and notable opportunities are identified in Saudi Arabia, the UAE, and Qatar, with a preference for bottom-up investments in domestic demand and infrastructure projects. Egypt's economy received a significant boost from a major investment in real estate by the UAE, surpassing market expectations and heralded as the largest single foreign direct investment in Egypt's history. However, we are still shying away from investing in Egypt stock market due to currency issues.

Among the sectors, S&P is of the view Dubai's residential property market is expected to cool over the next 12-18 months due to increased supply and global economic pressures. Abu Dhabi residential real estate has limited risk of reversal. In KSA, sensitivity to high interest rates and price increases led to a reduction in real estate transactions in 2023. We expect the demand to remain robust backed by Vision 2030 investments attracting new businesses and expats to the country. Interest rate decline from H2 2023 could revive the mortgage after 35% drop in 2023.
